# Licensing Plans

**CIMTOPS**

# Table of Contents

- On-premise Package (Self-Hosted)
- On-premise Subscription (Self-Hosted)
- i-Reporter Cloud
- Maintenance Support Contract

# On-premise Package

- ConMas i-Reporter Package is for those wanting to deploy i-Reporter on their own servers (on-premise) or on their cloud provider of choice (Azure, AWS, GCP, Digital Ocean, etc.)
- It is a one-time purchase that includes a server license (can be used without an expiration date) and a set number of user licenses
- The number of users or add-ons cannot be reduced after purchase
- There is no difference between the one-time payment server and subscription on-premise server
- A one-year maintenance support contract must be purchased, any additional maintenance contracts after the first year are optional and can be added at a later date

# On-premise Subscription

- ConMas i-Reporter Subscription plan is for those wanting to deploy i-Reporter on their own servers (on-premise) or on their cloud provider of choice (Azure, AWS, GCP, Digital Ocean, etc.)
- Available as a monthly or yearly contract
- No different from the non-subscription version
- Both monthly and annual fees include the maintenance fees for future updates and patches

## i-Reporter Cloud

- Hosted and managed by CIMTOPS engineers
- Available as a monthly or yearly contract
- Includes all updates and patches without a separate support contract
- Some limitations compared to self-managed deployment, such as API Rate Limits

# Maintenance Support Contract

- Access to support documentation
- Technical support and feature suggestions via the support portal
- Updates and patches for all software

\* All maintenance plans for the different server deployments are the same.
