Before introducing					

65% reduction in labor time with i-Reporter — **105** hours/month

No need to print out paper, work instructions can be automatically preset into forms in advance.

In addition, once the work and forms have been recorded, you just apply for approval to complete the work.

This eliminates report writing and duplicated entry.
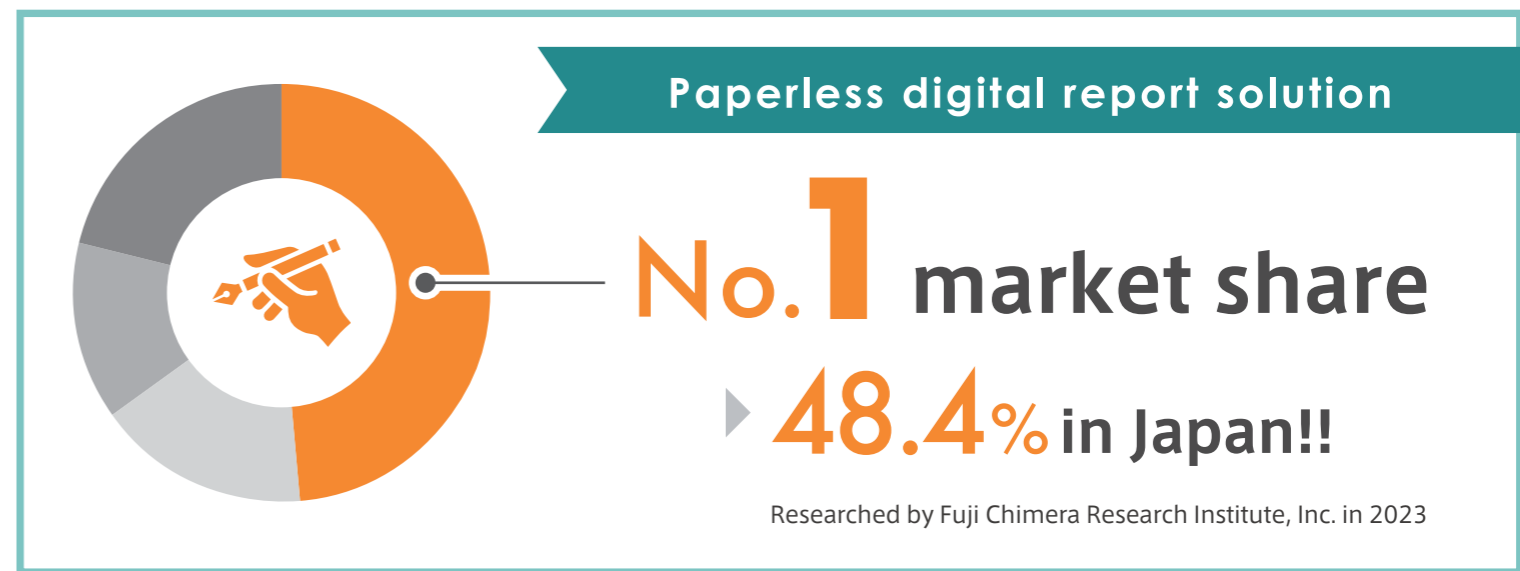

System Configuration

i-Reporter

i-Reporter

Explained in **3** minutes

Acquire information from any external data source in real-time

on i-Reporter forms

Paperless digital report solution

No.1 market share

▶ **48.4%** in Japan!!

Researched by Fuji Chimera Research Institute, Inc. in 2023

CIMTOPS

Do you have any problems of
"Paper Report" on-site?

Problems of paper reports

Problems when filling out

- Missing entry
- Entry error
- There is a difference in how to fill in (personalization)
- Fill in the same content over and over

Post-processing issues

- Aggregation work
- Creating a report
- Registration to the system

☐ Site information does not come up immediately

☐ Unable to find desired information immediately due to the paper and Excel forms

☐ Aggregation and analysis takes time and effort

We can't lose papers in the field forever...

Paper forms are easy to use for on-site recording and reporting

Light	Easy to write	Free Layout

Features of i-Reporter

What we aim for with i-Reporter

👍 **A tool that is easier to input in the field** than paper forms

👍 **A tool that don't require time and development costs** to share and visualize the right information

↓

Work efficiency and quality improvement, faster & cost reduction

1 The Excel form layout and functions can be transformed in tablets (iPad, iPhone, Windows) easily by direct entering.

2 Our native ipad application has great functions, can operate fast and light. Possible to use even without network connection.

3 Related documents can be viewed such as drawings and instruction manuals on iPads.

4 Centrally manage all the forms by data base. Easy to link automatically with the other backend systems.

Paperless
Input directly the forms in tablets!

Complete recording on site
Digitaizing all the reports (for example, maintenance inspection records, daily manufacturing reports, quality records etc.)

Even working from home, easy to confirm and approve promptly.

▶ **Practical for telework!**

Strong support for "Work style reform"
