

REDUCE COST · TIME · WASTED WORK

i-Reporter

REDUCE 65% report work

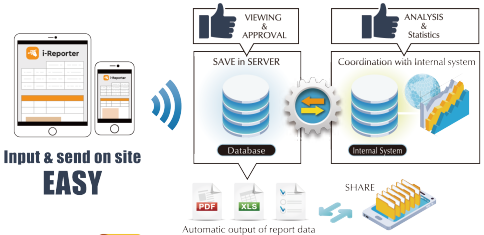

I-REPORTER SOLVES ALL PROBLEMS RELATED TO PAPER FORMS

i-Reporter

New style of "on site Field Reports" with recording, reporting and browsing that integrates digital input and handwritten report.

Why not achieve a new style of management?

- ◆ Authority management
- ◆ Input history
- ◆ High security
- ID/Password
- Period of validity and strength for PW
- Terminal authorization
- Authority groups
- Input history
- Reason for change
- Login history
- HTTPS Encryption Communication
- Camera control or signal app. mode in MDM

Leave the office on time!
Go on a date!
Get back home!

Changing your handwritten reports into digital format inside a Tablet

Current daily-use paper reports in Excel are turned into digital reports while maintaining the benefit of paper forms. Finally possible to digitalize old paper-form workflows that couldn't be changed until now to improve work efficiency and speed.

Report is completed on site
No need to go back to the Office

Image for implementation of ConMas i-Reporter

- ★ Library function allows browsing of related documents, operation manuals, drawings, etc. while reports are input.
- ★ Offers the powerful functions and speedy operation of an iOS, Windows native application. Available to operate under an all-line environment.
- ★ Manage all report data in a database. Automated collaboration with other backend systems is also simple.

I-REPORTER FEATURES

Use Excel Forms

Your accustomed Excel forms can be moved directly into an electronic form for an iPad or a Windows tablet. You can move to a paperless system without losing any of the convenience of handwritten paper forms.

Native App

Since the product is a native app for iOS/Windows, its operation is simple, light, and fast. Input settings can be used to prevent input errors or omissions.

Document management

The document management function offers users simple and secure browsing of relevant documents such as manuals, Microsoft Office, or website contents. There is no need to carry heavy documents around any longer.

PROPOSAL FOR I-REPORTER USE

- 1** Need reporting work at the office after on site operation...Is there a lot of additional paper report work involved?

Achieve paperless workflow easily. Reduce wasted time and cost related to paper report workflow!
- 2** Value of paper reporting... are there mistakes and omissions?

Various input styles and convenient features support easy input and help avoid mistakes and omissions!
- 3** Paper report workflow... Is it impeding work efficiency and the sharing of information?

Improve productivity and speed in sharing information by completing report work on site!
